

COVID-19 Update – January 14, 2021

Due to the latest Stay at Home Order from the Province, here is an update from the SMI team about our operations:

1. In accordance with Provincial Government directives, Sanderson Management Inc. is an essential service and will continue to operate during the lockdown. We have implemented all the COVID-19 precautions outlined in our Safety Plan and will remain vigilant by: limiting contact, screening before entering our facilities, physically distancing, handwashing, sanitizing our workspace, and wearing PPE.

2. We have processes in place to ensure that the financial portion of our contracts is being fulfilled. We are working hard at completing financial statements, and getting payments out to all service-providers.

3. We are working with our contractors to schedule work that is deemed safe to protect our residents, and contractors. The contractor will likely ask you screening questions, including to disclose any recent travel, if you are experiencing symptoms or if you are isolating.

4. Contractors attending to essential services in condominium buildings are taking precautions to keep you and themselves safe while they complete their work. We ask that you respect the physical distance recommendation of at least 6 feet of separation, and do not approach them closely.

5. We are staying informed, doing our research and taking this situation day by day. We will continue to do our best to protect all of our properties and maintain our standard of work and management. We will continue to send updates and stay in communication with all of you.

Stay safe, and stay healthy!
SMI Team
